PREFACE.

The following catalogue of the Fossils of the Cincinnati Group, is a compilation from the various catalogues which have appeared from time to time. These were by Mr. U. P. James, Mr. S. A. Miller, Mr. E. O. Ulrich, and Messrs. Wetherby and Mickleborough. Besides the fossils of these lists, there have been incorporated in this one all the species described up to November 1, 1881, and published in the *Journal of the Cincinnati Society of Natural History* and elsewhere.

The object in view in the printing of this list, is to have it answer as a check list of the fossils of the Cincinnati Group; and to serve to show the species of the Group represented in the cabinet of the society. The species in the cabinet are marked with an asterisk (*) for good specimens, and a dagger (†) for poor specimens. Those without any mark are not represented at all. The genera of the various classes, and the species of the genera, have been arranged alphabetically for convenience in reference. A number of Mr. Ulrich's species, taken from his catalogue, have not as yet been described. Such species are indicated by a section mark (§) at the end.

DIGEST OF THE
LIBRARY REGULATIONS.

No book shall be taken from the Library without the record of the Librarian.

No person shall be allowed to retain more than five volumes at any one time, unless by special vote of the Council.

Books may be kept out one calendar month; no longer without renewal, and renewal may not be granted more than twice.

A fine of five cents per day incurred for every volume not returned within the time specified by the rules.

The Librarian may demand the return of a book after the expiration of ten days from the date of borrowing.

Certain books, so designated, cannot be taken from the Library without special permission.

All books must be returned at least two weeks previous to the Annual Meeting.

Persons are responsible for all injury or loss of books charged to their name.
